PermaCool technology reduces the surface temperature of your seating upholstery by up to 16°C when compared to regular vinyl-coated fabrics. Results were obtained following measurements done in accordance with ASTM D 4803-10 .

Permablok® Plus from Spradlings is a newly developed protective coating combining the well-known and proven Permablok formula (anti-bacterial and anti-abrasion) with an enhanced resistance to stains: it seals the surface providing a shield against stains, makes cleaning easier and improves removal of dye-transfer .
